**Special Liquids:**

EPSON Original Shipping Liquid for Printhead Daily Maintenance, 1L	Pre-Treatment Liquid for Cotton Based Textile DTG Printing, 1L
F-EPSON/LIQUID	F-DTG/PRE
R1,599	R209

**About Inks:**

Water-Based Dye Ink: Very affordable, vivid colour, very unlikely to block printhead, for paper-based material only.  
Water-Based Pigment DTG Ink: DTG is for Direct-To-Garment, mainly print cotton-based clothing, pre-treat suggested.  
Dye Sublimation Ink: for Ploy-Fabric, can use for fabric with cotton up to 15%, need heat transfer equipment.  
ECO-Solvent Ink: print all kinds of material from paper-based to PVC-based (e.g. vinyl), waterproof, indoor & outdoor.  
LED-UV Ink: Cure by UV light, resist UV once printed and waterproof. Able to print on all kinds of material and object.  
Neon Ink: Ink with Fluorescent Neon particles added, result a glowing effect. Good for clothing, signs and car wrapping.  
Flexi & Hard Ink: Flexi ink is stretchable and good for fabric printing, hard ink provides wear resistant for hard surface.

**UV Printing Primers:**

	Glass, 2L	Ceramic, 1L	Plastic, 1L	Metal, 1L
F-UV/PRIMER/	GLASS	CERAMIC	PLASTIC	METAL
	R2,499	R1,399	R1,399	R1,399

UV Glass & Ceramic Primer come with two bottles need to mix before use, mix the amount you need and use within 2 hours. Apply with nonwoven cloth, able to print after 10 minutes, total dry after 48 hours or more in Winter. Not every materials need primer. If you do need, choose Ceramic Primer for universal use.
